

# WoodPlan

integrated solutions for arboriculture and forestry

## Mobile

### What is WoodPlan Mobile?

WoodPlan Mobile is a portable tree survey and database reporting package for both office and on-site use. It's main objective is to facilitate the pro-active management of your trees.

### What can WoodPlan Mobile do for you?

You can:

- Plot and record tree details on-site directly to a map
- Manage trees, set inspection cycles and program work
- Layer maps and aerial photos as a base to plot trees
- Use GPS
- Use all Ordnance Survey background maps and calibrated AutoCAD drawings
- Record comprehensive inspection details of any tree or woodland group
- Recommend works against any tree or woodland group
- Produce detailed reports accompanied with great looking maps for your clients
- Build up a historic database of all inspections
- Apply risk categories to any tree within the system (user defined)
- Edit picklist menus and headings to suit your requirements
- Export work to all common Microsoft and GIS formats
- Link with ESRI ArcView, MapInfo and MapMaker

WoodPlan Mobile is designed and produced by WoodPlan Limited, one of the UK's leading suppliers of Tree Management Systems to local government, utilities, the forest industry, the education sector and private landowners.

WoodPlan Mobile is designed to run on Tablet PCs or UMPCs (Ultra Mobile PCs) running either Microsoft Windows XP Tablet or XP Pro or Microsoft Windows Vista (all editions). WoodPlan can advise you on the the most suitable device for your needs and help you get started.
